Welcome to Huron River Lactation

Meet Adrian Fear, Owner and IBCLC

I have been working in the field of lactation for over 5 years. Providing services to families in their home is important to me.

During a home visit I will take a detailed medical history for mother, baby and the birthing process. I will weigh the baby on my professional scale. We will go over the families current concerns and goals for breastfeeding. I will observe the entire feed. If possible re-weigh the baby for a weighted feed. After the visit, I will send my report over to the medical providers involved. Typically I send the family a follow up email 24-48 hours after the visit. The family is welcome to message me as much as needed, I am here to support their entire breastfeeding relationship.

Most mothers are interested in using a breast pump either casually or when they return to work. During a visit we will go over how to use their breast pump, size the flanges and go over milk storage guidelines.

I have paired with The Lactation Network and have the ability to accept most major insurance plans.

Questions about services offered, feel free to reach out.

Adrian Fear, BA, IBCLC,RLC
